DOVETAIL****

Introducing the new Pantry Drawer System from Western Dovetail.

Western Dovetail Pantry Drawers are a unique system is designed around the popular Blum TANDEM drawer slide. The advantage of using the Western Dovetail system is that no matter what configuration you choose, it is all the same as a standard dovetail drawer on a Blum TANDEM slide. The only difference is that multiple drawers are combined to create a single multi-tiered pantry pull-out drawer unit. It's easy to add spice steps, knife blocks, or any other drawer inserts to create a custom specific purpose drawer.

- All units come completely assembled and ready to install.
- All units are prepped for full-extension Blum TANDEM slides with soft-close BLUMOTION at both the top and bottom for a stable installation that won't wobble.
 - *Top and bottom slides are always set at 32mm increments allowing for easy integration with 32mm system holes.*
- Blum TANDEM Side adjustable Locking devices are included on all models 6" and above.
 - *Side adjustable locking devices allow for easy lateral adjustment at both the top and bottom of the units*
- Blum TANDEM slides are **not** included in the package so you can choose whether to use standard or heavy duty models.
 - *Purchasing slides separately allows the customer to choose which slides to use.*
- Front and back panels are line bored for easy adjustment of movable trays.
 - *Special 5mm/3mm shelf pins are used to lock adjustable drawers into position*
- No rub bushings required!
- No brackets or hardware required for attachment to cabinet doors.
- All units can be used as stand alone pull-outs behind a door, or attached to a cabinet door as a pantry drawer unit.
- Can be used with overlay face frame cabinets with rear mounting brackets when opening matches listed minimum opening sizes.
 - *For cabinets with openings greater than listed sizes, blocking may be added to the sides of the cabinet to achieve the desired fit eliminating the need for rear mounting brackets.*
- Can be used with full inset face frame with face frame mounting brackets and rear mounting brackets.
 - *For cabinets with openings greater than listed sizes, blocking may be added to the sides of the cabinet to achieve the desired fit eliminating the need for mounting brackets.*
